

LIGHTING EQUIPMENT 2019

Thank you for picking up or downloading the current CARRIER-media Ltd equipment list. Please revisit the <http://www.carrier-media.co.uk> website for more information; credits, news, contact details and updated equipment details.

The following equipment is bundled **free** with my services in the role of Gaffer on your project and I'm happy to arrange additional equipment hire through a leading rental house, almost without limit.

- 1 off DF50 Cracked Oil Machine (DMX)
- (* - Upon Request £85.00/day)

Logistics

It's all about getting your Production on the road, without fuss or stress. Thirty free miles per day and only 80p per mile thereafter.

3.5T Lighting Van

The continued use of an unbranded van means that we can keep a low profile, which is welcomed by clients and a requirement of some locations.

Larger scale jobs will require more kit and I work tirelessly to run these jobs seamlessly, managing deliveries and collections, supplying generators or multiple lighting trucks/generator carriers through my Rental Partner.

For Documentaries and other smaller scale productions, this vehicle might be the only technical vehicle and I'm happy to supply Camera Grip and other items as required, almost without limit.

Consumables

The CARRIER-media Ltd Lighting Van carries a large on-hand stock of lighting gels sold by the meter, not the roll. Frost and Diffusion, Colour Correction, Neutral Density, FX Colours and +/- Greens Correction. I'm happy to get additional gels as per your requirements. Other Consumables from tape to poly board, sash cord to electrical tape are carried, ready for action.

Costing information is provided within the Confirmation document issued before the start of the job and items on the invoice are date and time stamped during the course of the job, cutting down the head scratching when it comes to reviewing the invoice later.

I'm happy to supply other items including floor protection upon application.

Crew

There is no intention of running a Recruitment Agency, however insuring the right staff with the right training and experience join the team is vital. Working with you to build the top class team your Production deserves, I'm happy to attach crew to my team and invoice for their services.

Radios

The van carries four two-way radios for the safety and efficient running of the electrical dept.

The Motorola CP040 is a industry standard unit with covert ear pieces so that even on the smallest of jobs the electrical department can achieve maximum productivity.

These radios require a UK licence and so a modest £10.00 change per booking will be applied if their use is requested or the location makes this a reasonable requirement.

Billing

In advance of your next job why not ask for an Estimate, which will be as detailed as possible, based on the information you supply. The estimate can even include a millage calculation, based on your chosen location/s.

Your invoice will include date and time stamped entries in relation to the activities of the day, allowing review at a later date.

For account clients 30-day interest free payment terms are provided.
